

Entertainment Devices: MAC Address Lookup

These instructions explain how to find the MAC address of some popular game consoles or entertainment devices. The MAC address is a number that uniquely identifies the network adapter of your device; this hardware address is required to register your device for access to UNCG's wireless network. If your device is not listed below, please reference your owner's manual for your device.

Microsoft Xbox 360

1. From the **XBox Dashboard**, select **System > Network Settings**.
2. Select **Edit Settings > Additional Settings > Advanced Settings**, then **Wireless Information**.
3. The wireless MAC address is displayed on this screen.

Microsoft Xbox One

1. Navigate to **My Games & Apps**, select **Settings > Network > Advanced Settings**.
2. The wireless MAC address is displayed on this screen.

Nintendo Wii

1. From the **Wii channel menu**, select **Wii Options** (the round button on the bottom-left of the screen with "Wii" on it).
2. Select the **Wii Settings** button.
3. Select the right arrow to enter the second page of settings.
4. Select the **Internet** option.
5. Select the **Console Information** option.
6. The wireless MAC address is displayed on this screen.

Nintendo DS

1. Start a WiFi compatible game.
2. Select **Nintendo Wi-Fi Connection Setup** from the game's menu.
3. Select **Options > System Information**.
4. The wireless MAC address is displayed on this screen.

Sony Playstation

1. From the **Main Menu**, select **Settings > System Settings**.
2. Select **System Information**.
3. The wireless MAC address is displayed on this screen.

Apple TV

1. Go to the **Main Menu** on your Apple TV, and select **Settings**.
2. In the Settings Menu, select **About**.
3. The MAC address should be listed as the **Wireless ID**.

Roku Player

1. From the Roku **Home Screen** select **Settings > Player Info**.
2. The wireless MAC Address will be listed on this screen.
